DEVELOPMENT OF LOGICAL THINKING OF STUDENTS IN ENGLISH LESSONS

One of the specific features of curriculums of literature and Azerbaijani language lessons is that pupils' intellectual, informative-communicative activity, formation of thinking, sensual and motional capabilities had been taken as a basis in the course of determining content standards. Literature and Azerbaijani language courses at school are subjects which play an important role in growing of real citizen and personality with modern outlook.

Like in all subjects, pupils' intellect develops during teaching literature and Azerbaijani language subjects. Generally, formation of intellectual activity and thinking capabilities depends on development of pupils' logical thinking.

A human reflects surrounding reality more deeply, fully and accurately by means of thinking. Finds out its objective laws, possesses certain knowledge about environment, and uses the same knowledge in life experience or directly in activity.
